

TECHNICAL DATASHEET

PVC AIRLINE HOSE

DESCRIPTION

Constructed from PVC, these hoses are suitable for general industrial use

All supply hoses are CE marked to EN 139 and are approved with the full range of Airline Breathing Apparatus.

Each hose is fitted with a male and a female CEN type coupling.

AVAILABLE LENGTHS

3, 10, 15, 20, 30, 50, 60, 90 metres

APPLICATIONS

The airline hose is specifically designed to transfer air between an air source and wearer of breathing apparatus. It can be used in conjunction with accessories such as a Y-piece to allow splitting of the hose.
